⭕ Muhammad Bilal

Profile

I am a dedicated backend developer with 2 years of experience in Laravel, focused on building secure, scalable systems. I am expanding my skills into modern frontend development with React, aiming to deliver complete solutions from robust APIs to dynamic, user-friendly interfaces. I emphasize innovation, clean code, and best practices in every project.

Education

2019 – 2023	**Bachelor's of Computer Science** *University of Lahore* ⬀
2017 – 2019	**FSc Pre-Engineering** *AL-Noor Group of Colleges* ⬀

Professional Experience

06/2023 – present — **Junior Laravel Developer**
Eye4Tech PVT LTD ⬀
- Developed robust, scalable backend systems and RESTful APIs using modern web technologies.
- Integrated third-party APIs and advanced services to extend application functionality.
- Designed and optimized database schemas (e.g., MySQL) for high performance and scalability.
- Collaborated with frontend and full-stack teams to ensure seamless API consumption and efficient data flow.
- Implemented authentication, role-based access control, and secure data handling practices.
- Contributed to performance tuning, code reviews, and application-level security enhancements.
- Participated in cross-functional team discussions to align backend logic with user experience and product goals.

03/2023 – 05/2023 — **Trainee Developer**
SeeBiz PVT LTD
- Gained foundational knowledge in **HTML, CSS, and JavaScript** for frontend web development.
- Built basic responsive web pages and practiced modern layout techniques (e.g., Flexbox, Grid).
- Collaborated with team members to understand project workflows and best coding practices.
- Strengthened understanding of version control systems like Git.

Projects

06/2023 – present — **Games Industry Network Project** ⬀
Backend Developer (Ongoing)
- Working on a **Games Industry Network** platform that connects professionals, studios, and organizations within the gaming industry.

- Building and maintaining secure, scalable backend features using **Laravel** and **MySQL**.
- Implementing **user profile filtering**, **industry categorization**, and **real-time data synchronization** across events and departments.
- Collaborating with frontend developers to ensure smooth integration of APIs and consistent user experience.
- Ensuring data integrity and performance through optimized queries, eager loading, and pagination techniques.
- Contributing to planning sessions, code reviews, and delivering production-ready modules.

08/2022 – 06/2023 **Dental Patient Cost Management System (DPCM)**
Final Year Project | MERN Stack | Team Project (3 Members)
- Collaboratively developed a web-based system to help dental clinics manage **patients, staff, doctors, and revenue**.
- Built key modules including **patient records**, **next-visit scheduling**, **treatment history**, and **billing management**.
- Implemented **role-based access control** for clinic owners, doctors, and staff members.
- Created a responsive and user-friendly frontend using **React**, with authentication and session management.
- Enabled **revenue tracking and reporting** to provide financial insights to clinic owners.
- Used Git for version control and coordinated tasks efficiently with a teammate throughout the development process.

Skills

Frontend Development
- React
- JavaScript (ES6+)
- HTML5
- CSS3
- API integration
- Tailwind

Database & Storage
- MySQL
- MongoDB
- Laravel Eloquent ORM

Other Skills
- API Integration
- Role-based Access Control (Spatie)
- MVC Architecture
- Team Collaboration
- Pusher (Real-time Events)
- Google Calendar Integration

Backend Development
- PHP
- Laravel
- RESTful APIs
- JWT Authentication

Development Tools
- Postman
- Git & GitHub
- PHP Storm
- Visual Studio Code
- Figma

Languages

- Urdu
- English
